Concept: Repeating tasks

Some tasks occur frequently, so we should schedule them frequently.

To schedule a repeating task you need to modify the timestamp. <2016-06-11 Sa **repeat**>

The term **repeat** can be:

+1w Next occurrence in one week. (w=week, d=day, m=month, y=year)

++1w Next occurrence on the same day of week, but definitely in the future.

+.4w Next occurrence 4 weeks after the task is marked as done.
